## Lucrana History

The stud was registered in 1986. The family having used Simmentals in the commercial herd for a number of years. Being impressed by the extra growth and muscling of Simmental cross progeny, as well as the maternal ability of the Simmental blood females, it was decided to purchase some stud females. A diverse group of foundation females was put together over the next few years. Today the breeding herd is run under what could be considered as tough commercial conditions.

Numerous natural service and A.I sires from the breeds leading bloodlines and herds have been added over the years.

In the early days of the stud the calves that were retained as bulls were destined for the Moore family's commercial crossbred breeding herd. As numbers grew, bulls were sold both privately and at various multivendor sales, in Toowoomba, Rockhampton, Wandoan, Casino, and Roma.

By 2012 the herd was of sufficient size to sustain our own annual sale, and the decision was made to hold our First On Property Sale.

In 2016 we embarked on a Black Simmental breeding program with the purchase of foundation females from the St Pauls herd, and look forward developing this new division in the future.

## Welcome to Lucrana Simmentals 8th On Property Sale

As we are all aware the seasonal conditions for the past 12 months over much of eastern Australia have been trying. And although we still haven't had a break in the Texas district, it is pleasing to see that many areas have now had some relief. In light of recent seasonal conditions, a common comment I have heard from clients in the past year or so is how well the Lucrana cattle hold up when conditions are less than ideal. I attribute this to the Lucrana female herd being run under tough commercial conditions in Traprock country, with selection over many generations for cattle that can survive and reproduce in this environment.

This year I am proud to present a diverse line of predominately polled bulls that I believe we can be justifiably proud of. Nearly half of the catalogue is bred via Artificial Insemination and Embryo Transfer, highlighting our commitment to the use of superior genetics and also the introduction of new bloodlines into the herd. The bulls have been prepared on a Rumevite Beef Weaner Pellet with free access to as much corn stubble as they can eat.

In a couple of firsts this year the sale will be interfaced with Elite Auctions giving those who can't make it on the day the chance to bid online. We are also donating half the proceeds from Lot 1 to The Black Dog Institute. These funds will help this excellent organization with research, and building awareness and understanding of mental illness. Mental health being a such an important issue in rural Australia today that touches many of us and one that I am personally passionate about.

I extend a warm invitation to everyone to come and view the cattle and enjoy some hospitality. I look forward to catching up on sale day.
